✓ JUST FINISHED

The Pakubuwono Spring, JAKARTA

The Pakubuwono Spring development consists of two apartment towers, 39 and 42 levels with 4-level basement, 148,000 sqm CFA, providing 543 units of luxurious 2-bedroom apartment with amenities like onsen spa on roof top

The structure have been topped-off in March 2017.

Client : The Pakubuwono Development
Architect : Airmas Asri
Contractor : Total Bangun Persada

World Trade Center 3, JAKARTA

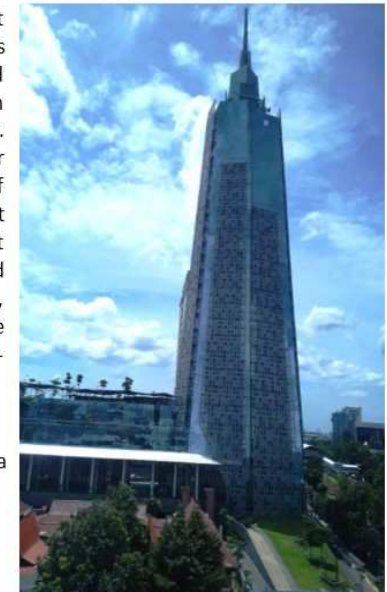

Located in Jl. Jend. Sudirman, Jakarta, World Trade Center 3 project has been topped-off of on April 12, 2017. Started on October 2014, this high end Grade-A office building, comprising of 41-story office space and 4 story retail space over 5-level basement was constructed with semi top-down method due to tight space constraint on site and very close proximity to surrounding buildings.

Client : JV Hongkong Land, CCM & Jakarta Land
Architect : Aedas Architect Singapore & Anggara Architeam
Contractor : Balfour Beatty Sakti Indonesia

Kompas Multimedia Tower, JAKARTA

This building is the first of three office towers which will be developed in Jalan Palmerah, Tanah Abang, Central Jakarta. The Kompas Tower (building-3) consists of 24 stories 163 m height with 3-level basement. It has a tapering form and a 54.8-M towering spire, with double-skin façade creating a unique statement for the building.

Client : Kompas Media Nusantara
Architect : DCM Indonesia
Contractor : Total Bangun Persada
